

#### Email 1:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"><li>• This seems like a regular email conversation.</li><li>• The senders email is not malicious</li><li>• The receiver of the email is replying to the email on time</li><li>• There are no links attached nor any attachments.</li><li>• The conversation is really to the point and short.</li><li>• Finally it is considered to be a safe email and a normal talk between friends.</li></ul>

#### Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"><li>• The email is not sent from an authentic source</li><li>• The email sender is asking the receiver to click on a link to update the OneDrive account.</li><li>• The link provided might be malicious .</li><li>• The email also seems really poorly compiled with unnecessary words capitalized such as ADOBE PDF and SECURITY.</li><li>• Overall the email is not consistent. The email and the display name are not matching at all.</li><li>• It is very good evidence to update email</li></ul>

### Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"><li>• This email has a link attached which might lead to some malicious website.</li><li>• The URL link provided is not authentic as the letter B for FACEBOOK is different. Also the link has htm written.</li><li>• The email is not specific to any intended receiver so it is possible that some sort of phishing email,</li><li>• The email also hints some urgency as the sender says that she can not login no matter how many times she tries.</li><li>• Therefore it is a malicious email that someone attempts to fraudulently obtain your personal information and security credentials.</li></ul>

### Email 4:

Is this email Safe or Malicious?	My Analysis
safe	<ul style="list-style-type: none"><li>• This email has forwarded messages.</li><li>• The email contains images and links to buy the gaming setup for headphones.</li><li>• The email also contains the details about the product which seems professional.</li><li>• The email does not have any malicious url therefore it's a safe email.</li></ul>

### Email 5:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"><li>• This receivers email is been compromised by an FBI agent,</li><li>• Even Though there are no links or any attachment to the email, the email seems unreal.</li><li>• the sender is asking for the credentials of the receiver which is malicious.</li><li>• The sender of the email explains how he would be going through the sender's email for security reasons which is highly unethical.</li><li>• Finally the sender even though knows that he is being tracked by the government is sending email from temporary account which is also malicious</li></ul>

### Email 6:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"><li>• The email urls are correct and no links are attached.</li><li>• The email sender is replying to the co-worker.</li><li>• The name the email uses is consistent with the display name.</li><li>• This is enough of an indicator that the email is safe.</li><li>• Overall the email is professional. Also 'anz' is capitalized, and the email provided is a business email and looks authentic.</li><li>• Finally all the details provided are correct and are not malicious.</li></ul>

### Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"><li>• The url attached is incorrect , Instead of https it says hxxp which is malicious.</li><li>• The user name and the display name are not matching.</li><li>• The link provided seems malicious .</li><li>• The subject of the email attracts the user by offering a 15% discount on car insurance which is a phishing trick.</li><li>• Finally the email seems unprofessional and not sent by any authoritative source.</li></ul>
